Web Developer

I am a Web Developer capable of creating complete web applications from scratch. I am knowledgeable about a wide range of web and internet technologies. I have a passion for creating resilient, scalable, and maintainable software. I am excited to improve the experiences of the users, both internal and external. I am meticulous, have a lot of attention to detail, especially when working with design specifications.

Work Experience

UEB Network Applications, Cuba — Web Developer

November 2021 – October 2022

- Worked with energy management systems.
- Implemented new features and modifications to existing applications, and performed other tasks as necessary.
- Created efficiencies to reduce unnecessary costs to existing applications.
- Maintained relevant documents and records and participated in the development of multiple websites.
- Collaborated with other engineers in solving problems with the systems we worked on.
- Learned client's line of business and proposed new solutions to problems.
- Wrote code that is maintainable and readable by other software developers.

Technologies: React / Node / Express / PostgreSQL / GitLab

Education

Central University "Marta Abreu" de las Villas, Cuba — Software Engineer

September 2015 – November 2021

Skills

Programming Languages: **JavaScript**, **HTML**, **CSS**, **Python**, **SQL**, **PHP**

Libraries & Frameworks: **React**, **Node**, **Express**, **Django**, **Vue**

Tools & Platforms: **Git, GitHub, GitLab, Netlify, Vercel, MongoDB, PostgreSQL, Docker, Figma, Postman**

Interests

Programming and software development.

Learning new technologies and programming languages.

Problem solving and algorithms.

Web development.
